SUMMARY

Full-Stack Developer with experience building and maintaining web applications using Next.js, React, and Node.js. Experienced through freelance and contract-based projects. AI-assisted development tools (Cursor, GitHub Copilot) into daily workflows to improve code quality, reduce debugging time, and deliver scalable features efficiently. Strong focus on clean architecture, performance, and getting things done in real-world production environments.

EDUCATION

- Shoolini University (Distance and Online)** Himachal Pradesh
Master of Computer Applications (MCA) August 2025 - Present

EXPERIENCE

- Binc** Oct 2025 - Present
 - Full-Stack Web Developer (Contract)**
 - What I Built & Use Case:** Built a social media content management SaaS that allows users to upload, manage, and publish Instagram and YouTube content from a single unified dashboard using platform APIs.
 - Key Features:** Implemented real-time analytics for views, likes, comments, and engagement, interactive performance dashboards, and automated post/video scheduling with optimized data fetching and caching.
 - User Value & Impact:** Enabled creators to save time, publish consistently, and track content performance efficiently; generated approximately \$1,000 in project revenue.
- The Proven Club** June 2024 - May 2025
 - Front-end Developer (Contract)**
 - What I Built & Use Case:** Designed and developed frontend for an AI-driven technical interview platform, supporting resume-based interviews, screening rounds, and multiple technical interview formats.
 - Key Features:** Implemented real-time interview monitoring, cheating detection, screen recording, and live communication using Socket.IO; integrated coding interviews, system design workflows, and AI-assisted evaluation features.
 - User Value & Impact:** Enabled founders and hiring teams to conduct structured, real-time technical interviews at scale, improving interview quality and reducing manual effort; delivered as a contract project valued at approximately \$1,500.
- iNeuron.ai** April 2024 - June 2024
 - Front-end Developer (Internship)**
 - Web App Development for Issue Management:** Developed a web app using React, Redux Toolkit, Tailwind CSS, and DaisyUI to simplify issue creation and management.
 - Link:** github.com/sutharrahul/git-issue-tracker

PROJECTS

- Swaras — Full-Stack Music Streaming Application:** — [GitHub-Link](#)
 - Full-stack music streaming web app using Next.js, TypeScript, Clerk, PostgreSQL, Prisma, TailwindCSS, and shadcn/ui.
 - Developed a custom audio player with play/pause, seek, volume, and queue-based continuous playback.
 - Implemented authentication and role-based authorization (user/admin) using Clerk to secure protected routes and admin-only features.
 - Created an admin panel for uploading songs album artwork with metadata extraction and Cloudinary storage integration.
 - Designed a normalized relational database schema for users, songs, playlists, and likes using Prisma ORM.

SKILLS

- Languages:** JavaScript, TypeScript, HTML, CSS, C
- Frameworks & Libraries:** React.js, Redux Toolkit, Next.js, Node.js, NestJS, Express.js, Prisma, Tailwind CSS, Mongoose
- Databases:** MongoDB, MySQL
- Tools & Platforms:** Git, GitHub, Cursor, VS Code, Postman, MySQL Workbench

CERTIFICATIONS

- Full Stack JavaScript Bootcamp 2.0 - :** — [iNeuron.ai](#)
